

ALEX NGUYEN

Cybersecurity Intern Candidate

Ho Chi Minh City, Vietnam | alex.nguyen@example.com | +84 000 000 000 | github.com/alex-nguyen-labs

SUMMARY

Final-year Cybersecurity student with hands-on SOC monitoring, SIEM alert triage, vulnerability assessment, network analysis, and secure scripting labs. Seeking an internship to support threat detection, incident response, and security operations with careful documentation and evidence-based analysis.

TECHNICAL SKILLS

- **Security Operations:** SIEM, Splunk, Microsoft Sentinel, alert triage, incident response, MITRE ATT&CK
- **Network and Endpoint:** TCP/IP, Wireshark, Nmap, Nessus Essentials, Linux, Windows, Active Directory, firewalls
- **Application Security:** OWASP Top 10, Burp Suite Community Edition, vulnerability assessment, remediation reporting
- **Scripting and Tools:** Python, Bash, Git, Docker, SQL

PROJECTS

Home SOC Monitoring Lab | Personal Lab | Jan 2026 - Present

- Ingested Windows and Linux logs into Splunk and created 6 detection queries for failed logins, privilege changes, and suspicious PowerShell activity.
- Investigated 25 simulated alerts, documented evidence and containment steps, and mapped findings to MITRE ATT&CK techniques.

Web Application Security Assessment | University Lab | Mar 2026

- Tested an intentionally vulnerable web application with Burp Suite and OWASP guidance; reproduced SQL injection and reflected XSS in an isolated lab.
- Produced a 7-finding report with severity, evidence, reproduction steps, and practical remediation recommendations.

EXPERIENCE

IT Support Volunteer | Student Technology Club | Sep 2025 - Present

- Triageed 30+ endpoint and account issues, applied least-privilege checks, and escalated suspected security events using documented procedures.
- Wrote concise troubleshooting notes and collaborated with a 5-person team during weekly support sessions.

EDUCATION

Bachelor of Cybersecurity | University of Technology | Expected June 2027 | GPA: 3.45/4.00

Relevant coursework: Network Security, Digital Forensics, Secure Coding, Operating Systems, Cloud Security

TRAINING AND ACTIVITIES

Training: Google Cybersecurity Certificate (2025); TryHackMe SOC Level 1 learning path (2026); CompTIA Security+ study in progress
